

Magnetic Products & Services, Inc.

Degaussing & Destruction Program

Magnetic Products & Services, Inc. has been eradicating over 50,000 tapes per month for companies nationwide over the past 18 years. We understand the sensitivity of your data and guarantee that your critical information will not be released. It is important to note that we do not have any equipment on site that allows us to read the data on any type of tape.

MPS will arrange and pay for all shipping. Tapes need to be boxed and shrink-wrapped to the pallets and available on your loading dock for pick up. Secure shipment is available for an additional charge. Upon arrival at our facility in Brooklyn Park, Minnesota, we will confirm the box count provided by the customer.

Upon request, we will scan each cartridge and provide a listing of the volser numbers we received. If a scanned list is provided by the customer, we can validate our scan against the customer's list. Confirmation of the cartridges received will be made before we begin to eradicate the data.

Each tape will be processed on our degaussers to sanitize your media in accordance with HIPAA media disposal mandates. After the tapes are processed, they are sent to a local waste management facility where they are incinerated and converted into "refuse derived fuel" that is used to generate electricity at a local plant.

To pursue a degauss & disposal opportunity, please contact us at **800-447-1277** with the type of media, quantity and brands that you have available.
