

DEFENDER™ PRINTABLE OPTICAL MEDIA

ADVANCED SECURITY

Automatically secure sensitive data with an easy-to-use encryption and burning application available directly on the Imation Defender™ Printable Optical Media. Create discs with innovative features allowing you to add, edit or delete files, create folders and use a simple drag-and-drop function. You can expect reliability and durability in the Imation Defender discs along with the opportunity to create a professional white inkjet printable surface. The disc formats are compatible with a variety of CD, DVD and Blu-ray drives making it easy for you to share your digital information*.

FEATURES + BENEFITS

FIPS 140-2, Level 1 Validated

Meet regulatory requirements with the Imation Defender Printable Optical Media, the product demonstrates security in areas related to implementation of encryption. You can be confident you are protecting sensitive data.

AES 256-bit Software Encryption

A simple one-step process protects your sensitive data with AES 256-bit encryption. The encryption operates directly from the disc eliminating the need to install, maintain or use third party burning and encryption software on your personal computer.

Customizable White Inkjet Surface

The print surface of Imation Defender Printable Optical Media extends all the way to the hub, offering full surface printing and greater design possibilities.

Optional Features

Administrator Management

Software allows organizations to have security controls identifying users and guidelines for use of encrypted optical discs.

Integrated Password Recovery

Password recovery and remote administrator password recovery service help ensure authorized users can securely recover forgotten passwords.
